AR Global
Report
2021

“As AR evolves, it will revolutionize our lives and **will become as significant of a technology shift as the web or mobile** was to society, changing how we view and interact with the world around us.”

AR interactions drive conversion

“The conversion rates that we’ve seen have surprised us, as a result **we’re doubling-down on AR** experiences to drive eCommerce.”

 Robert Triefus
EVP of Brand & Customer Engagement
Gucci

1: Harvard Business Review Article, "How AR is Redefining Retail in the Pandemic"

Interacting with products that have AR experiences leads to a

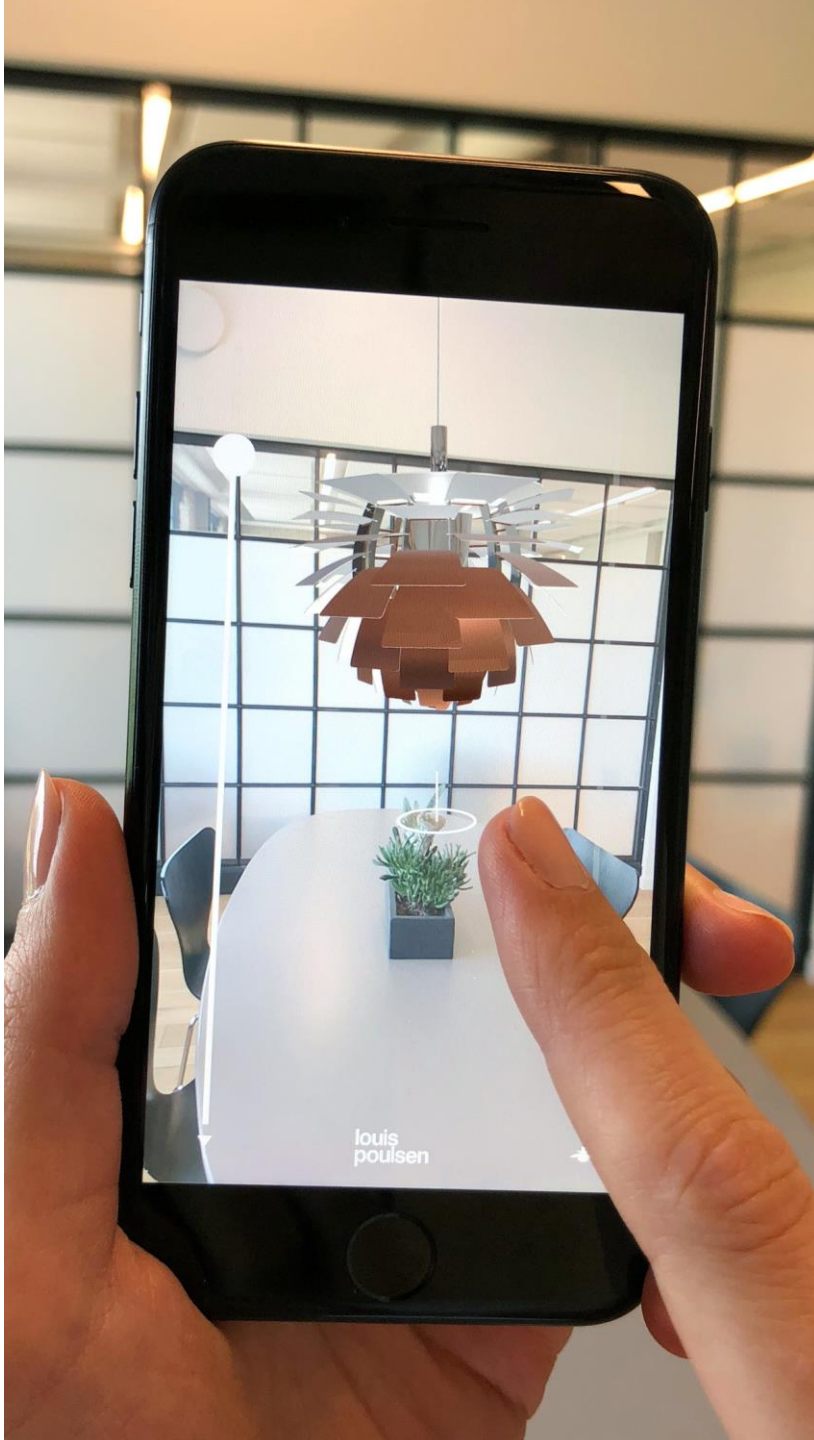

94%

higher conversion rate, as individuals can better assess them and feel connected with brands.¹
